PERMANENT CHANGE OF STATION (PCS) OVERVIEW

The Civilian PCS module allows users to quickly derive an estimated cost to move a civilian from one location to another. It uses several initial assumptions to derive the starting cost which is then user adjustable to tailor the estimate to the specifics of the move. Because Civilian PCS is governed by numerous cost components with their own set of rules and regulations, AMCOS sections out the PCS page by cost element and provides reference to applicable policy.

SAVE/OPEN/EXPORT

The icons at the top right of the screen provide the functions of (from left to right): open, save, and export. The name of the open project will display to the right of the icons. As you navigate from one PCS screen to the next, the application will always autosave any changes made. That autosave may then be recalled via the open dialogue at any time. To deliberately save the project and give it a specific name, utilize the save icon.

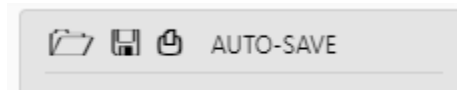

Figure 1: PCS Main Page

INFLATION

The Output/Target Year, if different than the Base/Input Year, will cause certain costs to be inflated/deflated according to the Joint Inflation Calculator (JIC). The impact of inflation/deflation of each PCS component is indicated in Figure 2 below.

Page	Element	Impacted by Inflation?	Comments
House Hunting Trips	Per Diem	✓	
Transportation Expense	Mileage Rate	×	The Defense Travel Management Office (DTMO) determines the Monetary Allowance in Lieu of Transportation (MALT) rate. This rate went down in recent years. Therefore, we hold at the current MALT rate due to uncertainty in years outside of the current base year.
Temporary Quarters Subsistence Expense	Per Diem	✓	
Goods/Home Transportation	Cost per mile	✓	
Goods/Home Transportation	Cost per pound	✓	
Miscellaneous Expense Allowance	Displayed maximums	×	The maximum amounts are not adjusted every year. So, we hold these values at their level in the current base year.

Page	Element	Impacted by Inflation?	Comments
Real Estate / Unexpired Lease	Default sale price, purchase price, and unexpired lease amount	✓	
Non-Temporary Storage	Cost per square feet	x	Due to the uncertainty of the cost per square foot, it is not inflation adjusted but you may change the total as needed.
Relocation Income Tax Allowance	Not Applicable	--	Values are percentages and are not impacted by the JIC.

Figure 2: PCS Cost Element Inflation/Deflation

SOURCE/DESTINATION

The PCS module (see Figure 3) calculates the distance based on the straight line between the latitude and longitude points we have for each location. You may adjust that distance if you know it to be greater or less than the displayed miles. In the case you need a more accurate estimate of the travel distance, please refer to either of these two systems:

- Defense Travel System at <http://www.defensetravel.osd.mil/dts/site/index.jsp> under Travel Tools, Distance Calculator
- TEAMS at <https://eta-teams.transport.mil/teams> under Defense Table of Official Distances.

The appropriation should reflect the 'color of money' used to pay for the PCS move, and it impacts the inflation figure used from the JIC. Upon selection of an origination and destination, the tool will immediately provide an estimated cost, but you should walk through each of the subsequent sections to customize them to your specific scenario.

Figure 3: PCS Main Page

HOUSE HUNTING TRIP

A house hunting trip is a discretionary allowance for the purpose of seeking a residence at the new duty location; your agency will determine if this is authorized. Reimbursement includes travel and transportation expenses for you and/or your spouse, together or individually, for one round trip between the old and new duty station. If you do not return to your old duty location, you have not taken an HHT.

Figure 4 provides for adjustments to the Housing Hunting Trip cost. Per Diem is calculated based on the latest data from the Defense Travel Management Office (DTMO) and adds two travel days (75% per diem * 2)

Figure 4: PCS House Hunting Trip

TRANSPORTATION EXPENSE

Transportation Expense (sometimes referred to as en route travel) allows you to be compensated for personal and dependent travel. Reimbursement includes travel and transportation expenses for you and your dependents for one trip by way of the most direct route from the old to the new duty station. Figure 5 estimates this cost based on driving distances. If the trip requires airfare or a combination of airfare and driving, the total may be overwritten with the user provided total.

TEMPORARY QUARTERS SUBSISTENCE EXPENSE (TQSE)

TQSE is a discretionary allowance that is intended to reimburse employees for some of the expenses associated with lodging, food, and other necessities when occupying temporary lodging at the old or new duty station. Your agency will determine if TQSE is authorized. The PCS module will estimate this based on DTMO per diem data (Figure 6).

GOODS / HOME TRANSPORTATION

Household goods transportation and storage are authorized to move items associated with the home as well as personal effects that belong to the employee and dependents from the old to the new duty station.

You may have the items moved for you at the government's expense through the Transportation Office (TO) or move your household goods at your own expense and request reimbursement. When you move your own HHG, you will be reimbursed for transportation and storage expenses not to exceed the government cost utilizing the transportation office.

The PCS module (Figure 7a & 7b) estimates the cost based on miles, weight, cost per pound, and cost per mile. All these fields are customizable based on the specific nature of the PCS move.

MISCELLANEOUS EXPENSE ALLOWANCE (MEA)

Miscellaneous expenses are the various costs associated with PCS that are not covered by other PCS allowances in the JTR. A MEA is payable when a civilian employee vacates a residence at the old Permanent Duty Station (PDS) and establishes a new temporary or permanent residence at the new PDS

The PCS module (Figure 8) estimates the cost based on set maximums but is user adjustable to account for potential deviations.

RELOCATION INCOME TAX ALLOWANCE (RITA)

The RITA reimburses an eligible transferred employee substantially all the additional Federal, State, and local income taxes incurred when receiving taxable travel income. Travel W-2 wages/income and withholdings are reported to the IRS. The PCS RITA screen is shown in Figure 11. Note that RITA may be advanced in portion through a Withholding Tax Allowance (WTA). For simplicity, the PCS module does not break out WTA from RITA. You may determine which portion of the RITA is given through WTA, if any.
