

AMCOS THE ARMY MILITARY-CIVILIAN COST SYSTEM

CALIBRE
Our Success Follows Yours®

AMCOS is a user-friendly automated tool providing cost estimates associated with military and civilian personnel requirements.

- **AMCOS develops cost factors for civilian, contractor, and military personnel costs. AMCOS allows users an opportunity to export report(s) to Microsoft Excel.**
- **AMCOS contains four major tools:**
 - **AMCOS Lite:** a quick and simple way to retrieve cost factors for specific types of military, civilian or contractor personnel. AMCOS Lite displays costs for each grade, appropriation and cost element. Users can tailor costs for specific career elements (i.e., MOS / AOC / Occupational Series). **For military pay plans, AMCOS Lite provides manpower training costs per weapon system.** AMCOS Lite provides current annual costs and can also convert costs to constant or then year dollars
 - **AMCOS Project Manager:** PM is very much like AMCOS Lite except it provides multi-year cost analysis for one or more pay plans over multiple years instead of one year. PM will automatically update when AMCOS is updated and will apply inflation in Budget/Then-Year \$s across the POM. PM does not convert costs from constant to then year dollars like AMCOS Lite does.
 - **Xwalk:** helps users analyze if it will cost more, less, or the same to use soldiers, civilians, or contractors to perform Army work. It provides a crosswalk (Xwalk) between related military and civilian careers to private labor market salary/benefits as reported by the Bureau of Labor Statistics (BLS) Occupational Employment Statistics (OES). Active Military Pay Plans work skills (MOS/AOCs) are associated with Federal Occupational Series (FEDCODEs) and Standard Occupational Classifications (SOCs). The Contractor Cost Estimate will have a subgroup containing an occupation associated with the MOS / AOC or civilian occupational specialties.
 - **Civilian PCS:** Provides a quick estimate of how much it will cost to move civilians from one location to another.
- **AMCOS receives one schedule update each year in the spring. Out of cycle releases may occur to implement new enhancements or remove old features.**

AMCOS Spring Update (User availability approximately late April / early May annually) includes:

Pay Schedule & Inventory:

Pay Plan	Pay Schedule		Inventory	
	Source	As of	Source	As of
Military	DFAS	January	Vantage	End of prior Government Fiscal Year (GFY)
Wage	DCPAS	March of the current Calendar Year (CCY)	Business Objects Intelligence	End of prior GFY February of CCY
SES	Business Objects Intelligence	February of CCY	Business Objects Intelligence	February of CCY
Civilian (non-GP)	OPM OPM-Special Pay	January of CCY	DMDC	End of prior GFY
CA, EE, EX, EF, IG, IE, IP, SL, ST, ZZ	OPM (if applicable)	January of CCY	GFEBs	February of CCY
GP	OPM	January of CCY	GFEBs	February of CCY

Pay Plan	Pay Schedule		Inventory	
	Source	As of	Source	As of
Lab Demo, Acq Demo	OPM & Federal Register Crosswalk	February of CCY	GFEBS	February of CCY
CCE	Pay and Inventory data comes from BLS OEWS release in March of each year			

*schedule above is typical but check the Release Notes documents for the details of the each release

Other Data

- The President Budget (PB) - AMCOS attempts to use the PBLOCK whenever possible. If it is not available, we will use another position which is noted in the release documents.
- Military conversions and valid MOS/AOC/WOMOS from the Personnel Authorization Module (PAM)
- Joint Inflation Calculator (JIC) – updated yearly usually between Feb and Apr
- Training
 - latest available TRADOC ATRM 159 report which is usually the GFY prior to the recently completed one
 - ATRRS attendance report for the same GFY as the ATRM 159 report
- OPM Occupational Group and Series changes
- OMB Circular A-94 Discount Rate Data
- Select FCoM cost element data (if available)
- Cash award, benefits, FICA, Holiday, Overtime and other ratio data from DASA-CE
- Latest available Employer Costs for Employee Compensation (ECEC) data from BLS
- ZIPs to FIPS crosswalk data for OPM locality areas
- Financial Management Regulation (FMR) changes
- Latest IRS FICA updates
- Defense Travel Management Office (DTMO)
- FMS Web UIC data
- Latest HRC MILPERS
- Updated Help & Support documentation

Additional items of note:

- AMCOS computes average costs one of two ways:
 1. Most AMCOS estimates depend on actual inventory data
 2. In a few cases (GS/GL/SES) AMCOS will generate a cost at the pay plan level for a location so that users have at least one cost estimate to use.
- AMCOS provides cost estimates and methodologies used to support budget and cost analysis.
- AMCOS must use the CAC Single Sign On capability Additionally, DASA-CE has to approve all AMCOS accounts.
