OVERVIEW

This tutorial provides basic instructions on how to use the AMCOS Project Manager application to generate multi-year costing projects containing different types of inventory. The information is presented in the order a project is built and contains screen shots and descriptions to facilitate navigation and comprehension. The tutorial provides an overview, general information, and an example of how to build a project from start to report generation.

Note: Adjust your browser's zoom level for easier viewing of this document's figures. You may also have to adjust your display resolution if your Home Page does not contain all the features in Figure 1.

USING PROJECT MANAGER

Launch Project Manager by selecting it from the **Applications** menu tab on the Home Page as shown in Figure 1.

Figure 1: Launching Project Manager

The following screen (Figure 2) appears after launching Project Manager. If any projects already exist, they appear here, and can be selected and edited. However, for this instruction “Tutorial Example” will be the first project.

CREATING A NEW PROJECT

To create a new project enter a Project Name and Description. These mandatory fields differentiate the various projects you create in Project Manager.

Enter the following information (also shown in Figure 2):

- Project Name: Tutorial Example
- Description: Example for Project Manager Tutorial

Press the **Add Project** button.

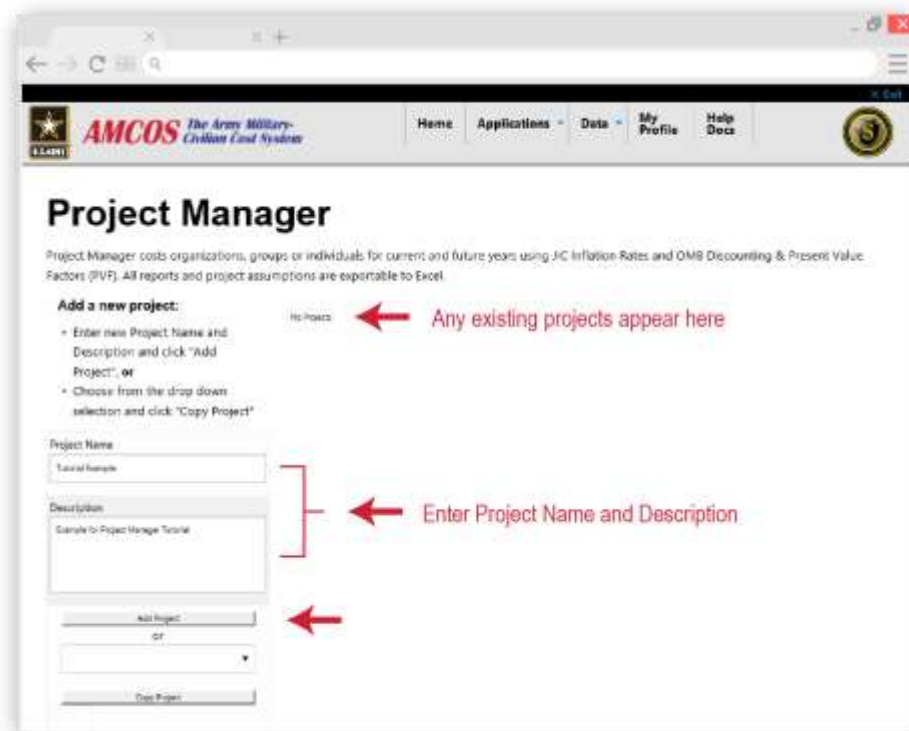

Figure 2: Project Manager Main Page with New Project Name and Description Entered

The following window (Figure 3) will appear with the new **Tutorial Example** project in the project list. Note that Project Manager adds the following information to new projects:

- Project Start Year
- Project Duration (In Years)
- Last Update (defaults to creation date for new projects):
- Create Date

COPYING, DELETING, AND SELECTING PROJECTS

CREATING A NEW PROJECT WITH THE COPY PROJECT BUTTON

For any existing projects (including a newly created project), a user can use the **Copy Project** button shown in Figure 3 to create a new project with similar personnel requirements. The **Copy Project** button can only be used with an existing project.

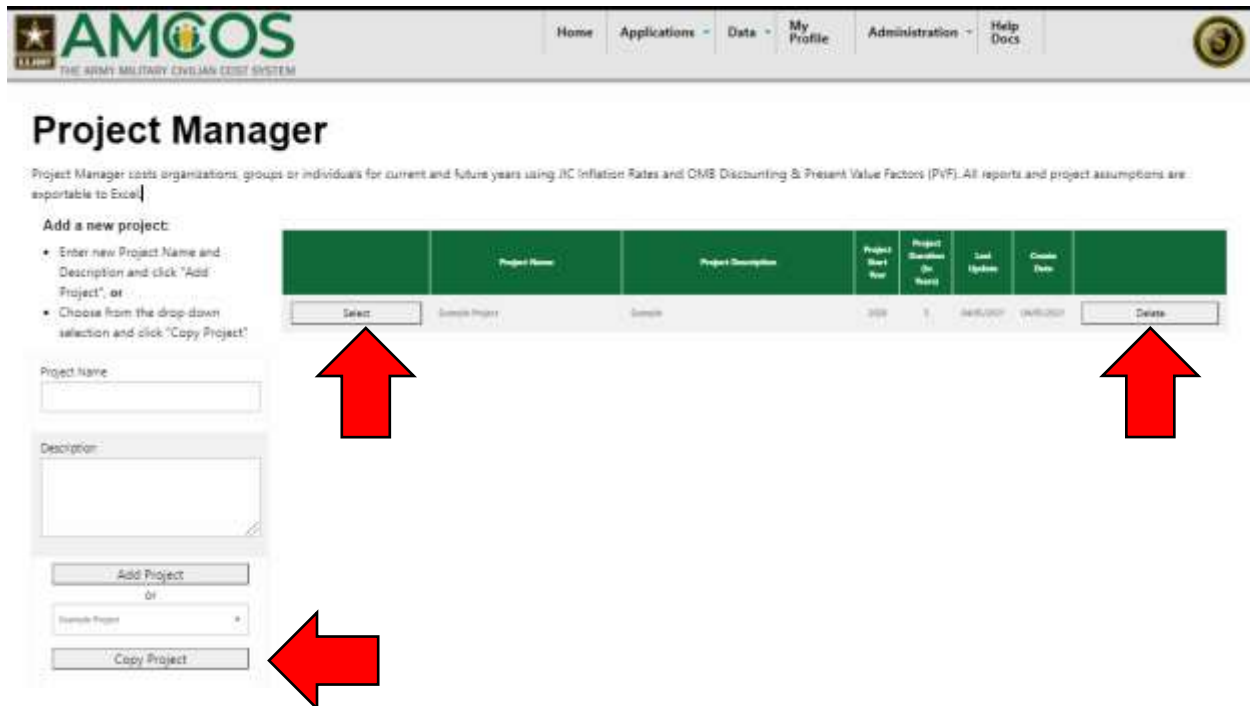

Figure 3: Project Manager Copy Project, Select, and Delete Buttons

DELETING AN EXISTING PROJECT

Every project line in the project list contains a **Delete** button. This button will delete the project listed on the line.

SELECTING A PROJECT TO WORK WITH

Click the **Select** button at the beginning of a project line to work with that project.

Click on this button to work with the Tutorial Example project now. The project Properties page displays (Figure 4).

WORKING WITH A PROJECT

Three pages contain the features in Project Manager: Properties, Faces & Spaces, and Output. Pressing the Select button (see Figure 3) will bring up the Properties page in Figure 4, which displays the project name across the top, links to each of the pages on the left and initial settings for the project in the center. The highlighted link indicates the page being displayed (i.e. Properties). Users can move between the project pages by clicking on the page links.

PROPERTIES

The Properties page displays and allows editing of the following project properties:

- Project Name
- Description
- Start Year
- Project Duration

Figure 4: The Tutorial Example's Project Properties Window

For this tutorial, make the following changes:

- Change Start Year to **the current year**
- Notice that the Project Duration defaults to 5

Click the **Next** button to advance to the **Faces & Spaces** page.

ADD UNIT

Beginning with the December 2022 update to Project Manager, users may now add an entire unit to their project with ease. After moving past the project properties via the next button users will see the Add Unit options shown in Figure 5. This is an option step so if you do not wish to start with a unit you may simply click next and skip this step.

Name: Example Project

Close Project

Description: Example

Properties

Add unit (Optional)

Faces & Spaces

Output

If you do not need to add an entire unit, please click the 'Next' button to move to Faces & Spaces where you can add positions individually.

Please select a unit to add:

Unit Summary (Pay Plan/Location) Selection(s): All	▼
Project Action Selection: Replace	▼
Unit Location Selection: Unchanged	▼
Fiscal Years Selection: Not applicable	▼
Contractor Cost Estimate Overhead: Not applicable	▼

Note: AMCOS may not have a cost for certain scenarios as our costs are based on inventory. In those cases, we will add the personnel to your project using the following priority:

1. Unit driven location(s) but Group average
2. Unit driven location(s) but Pay Plan average
3. All locations (average) and Unit driven Subgroup(s)
4. All locations (average) and Group average
5. All locations (average) and Pay Plan average
6. A zero cost

Previous

Next

Figure 5: Add Unit

After selecting a unit you will be presented with a series of options to customize how AMCOS adds the unit to your project.

First, the list of pay plans, and their native locations will be shown which you may down select if desired. All pay plans are selected by default. If AMCOS is unable to resolve the FMSWeb's unit location to a location in our system, then we will default it to the national average, which you may change later.

Unit Summary (Pay Plan/Location) Selection(s): All			
Select	Pay Plan	# Personnel	AMCOS Pay Plan Location
☒	AE	400	ANCHORAGE, AK
☒	AO	101	ANCHORAGE, AK
☒	AWO	36	ANCHORAGE, AK
☒	GG	3	Anchorage, AK
☒	GS	68	Anchorage, AK
☒	WG	3	State of Alaska (AK)
☒	WS	2	State of Alaska (AK)

Figure 6: Unit Summary

Next, you may decide how AMCOS handles this unit. You may: 1) replace the main project with it; 2) append it to the main project; 3) or create and name a new sub project and place the unit in it. Note that at this time you may not replace or append a unit to an existing sub project, only to your main project (the one created when you started the project).

Project Action Selection: Replace

Select the action below you would like taken in regards to your existing project

- ☒ Replace the main project
- ☐ Append to the main project
- ☐ Add this unit as a subproject with name:

Figure 7: Project Action

If you need to change the location of the unit, or if AMCOS is unable to resolve the unit to a location and you would like to adjust it off the national average, then you may do that in this section. The list of locations shown are the Military Installations that AMCOS tracks. If you need a new military location not shown, please contact us for assistance.

Unit Location Selection: **Unchanged**

Select whether you would like AMCOS to change the entire location of the unit for all pay plans. Note that if you choose an installation for which AMCOS does not have data, the application will follow the reassignment priority shown at the bottom of the page.

☒ Leave the location unchanged

☐ Use a National Average

☐ Choose a new location

Select a Location

Figure 8: Unit Location

Next, you may select how to handle differences in your project's and the data's Fiscal Years. Options here will depend on the selected UIC:

- TDA: Since FMSWeb does not project TDA unit structure beyond 1-2 years, AMCOS will use the latest TDA structure we have for all years of your project, making no selection needed here (see Figure 9a)
- MTOE: AMCOS will attempt to sync your Project's Fiscal years with the SACS' fiscal years, which will capture unit person and structure changes over time. If you instead prefer to hold constant the unit structure and composition at a specific year then (see Figure 9b)
- MTOE Extended: Let us say that you created a 10 year project. The SACS file usually only goes 7 years out. Any years in your project that do not link up with a SACS year needs to have something done about them. In that case, you are presented with a second option. This option allows you to tell AMCOS to either (see Figure 9c):
 - Hold the project at the last available year (e.g. your project goes to 2040 but the last available SACS year is 2030 so your project's 2031 through 2040 years will hold at the 2030 unit composition). This is the recommended and default option for reasons described below.
 - Use the Objective TOE (OTOE). The OTOE is the fully modernized version of the unit if all Basis of Issue Plans (BOIPs) were applied today. It's unlikely that this unit will ever exist as modernization requirements continually change. Thus, it is typically used for research purposes. If you understand the considerations around the OTOE but still prefer to use it in your project, then, this option will allow you to do that (see Figure 9c).

Fiscal Years Selection: **Not Applicable**

You've selected a TDA or Aug TDA unit so AMCOS will use the latest FMSWeb lockpoint data for all years of your project.

Figure 9a: FY Selection: TDA

Fiscal Years Selection: Sync; Last MTOE for project years that extend SACS years

You've selected an MTOE unit. AMCOS can automatically set your project to follow changes in the SACS file year over year, or stay static.

☒ Sync your project's years to the SACS' years

☐ Freeze the data at year:

Select a year

Figure 9b: FY Selection: MTOE

Fiscal Years Selection: Sync; Last MTOE for project years that extend SACS years

You've selected an MTOE unit. AMCOS can automatically set your project to follow changes in the SACS file year over year, or stay static.

☒ Sync your project's years to the SACS' years

☐ Freeze the data at year:

Select a year

Your project extends beyond the available FYs in the SACS file. Do you want to:

☒ Freeze project years beyond the current SACS at the last available MTOE year

☐ Use the Objective TOE (OTOE) for years beyond the SACS years

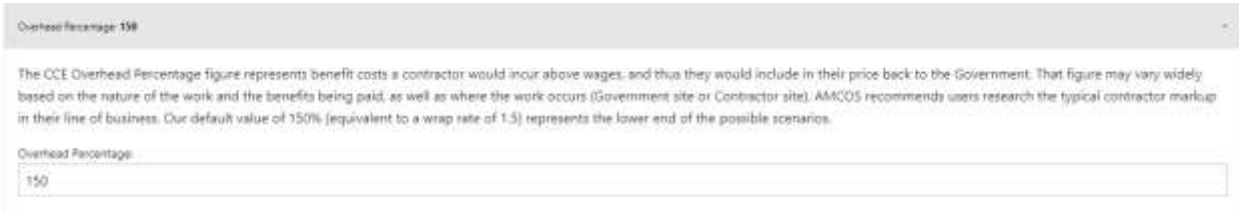

Figure 9c: FY Selection: MTOE Extended

If your unit does not include Contractors (TDA only), then you will see Figure 10a and no further action on your part is needed. If you do have a Contractor (AMCOS pay plan Contractor Cost Estimate (CCE)), then you are presented with a choice on overhead percentage which is defaulted to 150%. Since different industries have different benefits and overheads this will vary depending on what the contractor is doing. This figure is sometimes also referred to as a wrap rate. For example, if a contractor pays \$1 in direct labor and their costs of benefits for every dollar is \$0.50 then their wrap rate is said to be 1.5, or 150%.

Overhead Percentage: **Not Applicable**

You've selected a unit that does not contain requirements for the Contractor Cost Estimate pay plan.

Figure 10a: CCE Overhead

Overhead Percentage: 150

The CCE Overhead Percentage figure represents benefit costs a contractor would incur above wages, and thus they would include in their price back to the Government. That figure may vary widely based on the nature of the work and the benefits being paid, as well as where the work occurs (Government site or Contractor site). AMCOS recommends users research the typical contractor markup in their line of business. Our default value of 150% (equivalent to a wrap rate of 1.5) represents the lower end of the possible scenarios.

Overhead Percentage:

150

Figure 10b: CCE Overhead

Lastly, we detail the mapping sequence used which is informational and shown in Figure 11.

AMCOS always wants to find the exact Pay Plan, Grade Level, Series (Subgroup), etc. that is resident in the unit data. However, AMCOS is an inventory based cost estimate system while FMSWeb is a requirements system. Therefore, we may not have a cost for every requirement. So, AMCOS works to find a cost by following these steps:

- Since location usually has a large influence on costs, we try to find something similar in that location by:
 - If we do not have the series we move up to the group (e.g., 11B becomes 11, or 1515 becomes 1500)
 - If we do not have that group either, we go up to the pay plan average
- A cost is better than no cost at all so then we go to the worldwide average:
 - Trying the series
 - If no costs, then we go up to the group
 - If still no costs, then we go up to the pay plan average
- Finally, we return no costs.

Note: AMCOS may not have a cost for certain scenarios as our costs are based on inventory. In those cases, we will add the personnel to your project using the following priority:

1. Unit driven location(s) but Group average
2. Unit driven location(s) but Pay Plan average
3. All locations (average) and Unit driven Subgroup(s)
4. All locations (average) and Group average
5. All locations (average) and Pay Plan average
6. A zero cost

Figure 11: Mapping Sequence

FACES & SPACES

On Faces & Spaces page (Figure 12), notice:

- A highlighted Faces & Spaces link on the left side indicates this is the active page.
- The Project Name (Tutorial Example) is displayed at the top.
- A highlighted button bar with the active project name is above the **Inventory** area. This area will also contain button bars for any associated sub-projects. See the [Add, Rename, or Remove Sub-Project Names \(PN\)](#) section for information on sub-projects.
- The **Inventory** area contains the individuals needed to support the project.
- The **Project Years** area shows the start year begins in 2020 and the project runs for five years.
- The **Personnel Category** selection boxes define the type of personnel (pay plan, career, grade, etc.) that will be added to the **Inventory** area when the **Insert** button is clicked. See [Appendix A – Pay Plans and Personnel Category Selections](#) for descriptions and selection boxes that appear for the various Pay Plans supported by Project Manager.

Faces and Spaces are for personnel inventory input.

NOTE: No output will be generated if no inventory is provided.

Edit any year's inventory and commit changes by clicking the "Update" button.

Example Project

No inventory found

4

Update

To add positions to the current project, complete the Personnel Area selections:

NOTE:

- Your initial manpower requirements build can be added to any one of the sub-project tabs.
- If you are unable to select a particular skill, there was no inventory reported for that skill at the end of the previous fiscal year.

Pay Plan: Active Enlisted (AE)

Group: All

Grade: 3

Figure 12: Faces and

ADDING INVENTORY

Inventory is added to a project by setting the **Personnel Category** and **Project Years** selection boxes then clicking the **Insert** button (see Figure 12).

An item of note about the **Pay Plan Personnel Category** selection is that when a user selects a Reserve / National Guard Enlisted, Officer or Warrant Officer Pay Plan, the **Active Duty Training (AT) Days**

window defaults to 15 days (Figure 13). This is changeable and the valid range is 15 to 342 days; this excludes the 24 days for Inactive (Weekend) Drill, as noted in the figure.

NOTE:

- Your initial manpower requirements build can be added to any one of the sub-project tabs.
- If you are unable to select a particular skill, there was no inventory reported for that skill at the end of the previous fiscal year.

Pay Plan
National Guard Enlisted (NE) 

Group
All

Grade
1

Active Duty Days
15 

Note: Costs include a fixed assumption of 24 weekend drill days. The default Active Duty days of 15 are for the two week annual drill period and may be increased, impacting variable cost elements.

Inventory

1	2	3	4	5
1	1	1	1	1

Insert

Figure 13: Reserve and National Guard Active Duty Training Days and Weekend Drill

Inventory is the number of individuals needed to support the project. For example, if three enlisted 11B (Infantryman) service members at a rank of E4 are required, the cost in the final report would reflect three times the Average Cost of Base Pay (Military) for an E4 (Weighted Base Pay * 3) and so on for the other cost elements that make up an E4's cost.

For our example make the below selections in the Faces & Spaces page. Note that when making a selection, it could take a few seconds for AMCOS to update the subsequent boxes.

- Pay Plan: Active Enlisted
- Career Management Field (CMF): 11 : **INFANTRY**
- Military Occupational Specialties (MOS): 11B : **INFANTRYMAN**
- Grade: **E4**
- Inventory: **1** (for each year)

Figure 14 shows Active Enlisted 11B (Infantryman) E4 service members ready to load into the project's inventory. Click the **Insert** button to load these now.

To add positions to the current project, complete the Personnel Area selections:

- NOTE:**
- Your initial manpower requirements build can be added to any one of the sub-project tabs.
 - If you are unable to select a particular skill, there was no inventory reported for that skill at the end of the previous fiscal year.

Pay Plan
Active Enlisted (AE)

1	1	1	1	1

Insert

Figure 14: Active Enlisted 11B E4s Ready to Load into Inventory

The Active Enlisted (AE) 11B E4s are now loaded into the Tutorial Example project's inventory area as the first line (Figure 15).

Faces and Spaces are for personnel inventory input.

NOTE: No output will be generated if no inventory is provided.

Edit any Year's inventory and commit changes by clicking the "Update" button.

Example Project

PayPlan	Group	Subgroup	Career Program	Location	STBL	Dependent Status	Number of Dependents	Active Duty Days	Overhead %	Grade	Year 2020	Year 2021	Year 2022	Year 2023	Year 2024	Delete
AE	11	11B	All	All	N/A	N/A	N/A	N/A	N/A	4	1	1	1	1	1	☐

Update

Figure 15: Inventory Area Containing AE 11B E4s

If a user needs to add more inventory to a project, then any pay plan, specialty, and grade combination can be selected and added from the **FACES & SPACES** screen.

Add a second line to the inventory now by choosing one Reserve Enlisted (RE) 11B E-1 for each of the project's years. Leave the Active Duty Training (AT) Days set to the default of 15. Your resulting inventory should contain two lines and match the inventory area in Figure 16.

Unit	PayPlan	Grade	Subgroup	Current Program	Initials	UIC	Requested Status	Number of Dependents	Active Duty Days	Overhead %	Grade	Year 2021	Year 2022	Year 2023	Year 2024	Year 2025	Buttons
AE	11	11B	AE	AE	AE	AE	AE	AE	AE	AE	AE	1	1	1	1	1	+
RE	11	11B	RE	RE	RE	RE	RE	RE	RE	RE	RE	1	1	1	1	1	+

Update

AE & RE

NOTE: For individual positions added using Faces/Spaces the UIC column will be blank. The UIC column is only used to indicate the source row if added using the 'Add Unit' screen.

- NOTE:**
- Your initial manpower requirements build can be added to any one of the sub-project tabs.
 - If you are unable to select a particular skill, there was no inventory reported for that skill at the end of the previous fiscal year.

DELETING INVENTORY

To remove inventory, click in the inventory line's check box under the **Delete** button, then click the **Delete** button (Figure 17).

ID	HighPlan	School	Subproject	Career Program	Location	STB	Employment Status	Number of Employees	Action Entry Type	Classified To	Grade	Year 2011	Year 2012	Year 2013	Year 2014	Year 2015	Delete
46	11	110	41	40	1/4	1/8	1/8	1/8	1/4	1/4	1						☐
48	11	110	41	40	1/4	1/8	1/8	1/8	1/4	1/4	1						☐

Update

Figure 17: Removing an Inventory Line or Changing an Inventory Line's Quantity. To delete a row, place a checkmark by the row to delete, then click the delete button. To update a row, change the text box value and click the update button.

CHANGING INVENTORY QUANTITIES

Figure 17 also shows how to adjust inventory quantities by changing the quantity for a year then clicking the **Update** button.

ADDITIONAL OPTIONS

The bottom of the Faces & Spaces page has two more important features shown in Figure 18 and discussed in the below sections.

Add, Rename, or Remove Sub-Project Names (PN)

Note - To rename the parent project use the properties page.

Enter Sub-Project Name

Create

Copy between a Project and Sub-Project

At times it may be useful to copy an entire Project's manpower requirements between a Project and Sub-Project.

- Before the Copy tool can be used a Sub-Project must already exist or be added
- Select the Project or Sub-Project tab to be populated
- Select a Project or Sub-Project from the drop down (only one can be selected at a time) and click the Copy button
- Repeat to copy other Project or Sub-Project

Previous **Next**

Figure 18: Additional Features on the Faces & Spaces Page

ADD, RENAME, OR REMOVE SUB-PROJECT NAMES (PN)

This option allows you to add a sub-project to the main project, rename the sub-project, or delete the sub-project.

Add a Sub-Project

Add a sub-project to the **Tutorial Example** project as follows.

1. If you aren't already in **Project Manager Faces & Spaces** with **Tutorial Example** selected as the main project, perform Steps a, b, and c below. Otherwise, continue with Step 2.
 - a. From the AMCOS main menu, click **Applications** then click **Project Manager**.
 - b. In the **Project Manager** page, click the **Select** button on the **Tutorial Example** project in the project list.
 - c. Click the **Faces & Spaces** link on the left side of the page.
2. In the **Add, Rename, or Remove Sub-Project Names (PN)** section at the bottom left of the **Faces & Spaces** page, enter a name for the sub project in the box under the words **Enter Sub-Project Name** and click the **Create** button (see Figure 19).

Add, Rename, or Remove Sub-Project Names (PN)

Note - To rename the parent project use the properties page.

Enter Sub-Project Name

Test Copy Project

Create

Figure 19: Creating the "Tutorial Ex Sub-Project 1" Sub-Project

When the Create button is clicked two updates will occur to the Faces & Spaces screen.

3. A button bar for the new sub-project will appear next to the **Tutorial Example** project button bar and above the **Inventory** area as in Figure 20. Note that the **Inventory** area displays the inventory for the selected project/sub-project. Since the new sub-project is selected and we haven't added any inventory to it yet, the **Inventory** area displays "No Inventory Found". Click on one of the project / sub-project buttons to display the inventory for that project / sub-project.

Faces and Spaces are for personnel inventory input.

NOTE: No output will be generated if no inventory is provided.

Edit any Year's inventory and commit changes by clicking the "Update" button.

No Inventory Found

◀

Figure 20: Faces and Spaces Tutorial Example with Sub-Project Tutorial Ex Sub-Project 1

- The second update to the Faces & Spaces page is that a **Rename or Remove Sub-Project Name** window containing our new sub-project appeared next to the **Enter Sub-Project Name** window (see Figure 21). The **Rename or Remove Sub-Project Name** window displays a list of all sub-project names for the current project along with buttons to **Rename** or **Remove** a selected sub-project. Note the main project (i.e. **Tutorial Example**) does not appear in this list because it cannot be removed or renamed at this level.

Add, Rename, or Remove Sub-Project Names (PN)

Note - To rename the parent project use the properties page.

Enter Sub-Project Name

Rename or Remove Sub-Project Name

Figure 21: "Tutorial Ex Sub-Project 1" Sub-Project Added

Clicking either the **Rename** or **Remove** button allows you to perform that button's function.

Rename a Sub-Project

Click the **Rename** button and a **New Name** box opens below the **Rename or Remove Sub-Project Name** box as in Figure 22.

Add, Rename, or Remove Sub-Project Names (PN)

Note - To rename the parent project use the properties page.

Enter Sub-Project Name

Test Copy Project renamed

Save

Cancel

Figure 22: "Tutorial Ex Sub-Project 1" Added

To rename a sub-project's name, type a **new name** in the **New Name** box and click the **Save** button. The name changes in the project's button bar caption (above the Inventory area) and in the **Rename or Remove Sub-Project Name** selection box as displayed in Figure 23 below. Note only the applicable areas of the Faces & Spaces page are shown in the figure.

Faces and Spaces are for personnel inventory input.

NOTE: No output will be generated if no inventory is provided.

Edit any Year's inventory and commit changes by clicking the "Update" button.

The screenshot shows a web interface for the Project Manager. At the top, there are two buttons: 'Example Project' and 'Test Copy Project renamed'. Below these is a text area that says 'No Inventory Found'. At the bottom right is an 'Update' button.

Figure 23: Results of Renaming Sub-Project

COPY BETWEEN A PROJECT AND SUB-PROJECT

Before continuing with this other Faces & Spaces option, configure your Faces & Spaces page as follows:

5. Click on the renamed project's button bar above the Inventory area to select your sub-project so that the button is highlighted as in Figure 23. The Inventory area displays any inventory for the sub-project.
6. If you added any inventory to the project, delete it now (see the [Deleting Inventory](#) section for instructions).
7. Your Faces & Spaces page should look like Figure 24. The items to note are (clockwise from upper right):
 - The sub-project button is highlighted.
 - The Tutorial Example project is set in the **Copy Positions From Project** selection box.

Faces and Spaces are for personnel inventory input.

NOTE: No output will be generated if no inventory is provided.

Edit any Year's inventory and commit changes by clicking the "Update" button.

No Inventory Found

◀ ▶

Update

To add positions to the current project, complete the Personnel Area selections:

- NOTE:**
- Your initial manpower requirements build can be added to any one of the sub-project tabs.
 - If you are unable to select a particular skill, there was no inventory reported for that skill at the end of the previous fiscal year.

Pay Plan

Next

Figure 24: Preparation for Performing the "Copy between a Project and Sub-Project" Function

Once your screen is configured like Figure 24, you are ready to execute the remaining additional option on the Faces & Spaces page, i.e., the function to copy inventory between a project and a sub-project. This option is to the right of the **Add, Rename, or Remove Sub-Project Names (PN)** and is shown in the bottom right portion of Figure 24 and larger in Figure 25 below. Notice that **Tutorial Example** is shown in the **Copy Positions From Project** box. This means that clicking the **Copy** button will copy the inventory from the **Tutorial Example** project to the current project.

Copy between a Project and Sub-Project

At times it may be useful to copy an entire Project's manpower requirements between a Project and Sub-Project.

- Before the Copy tool can be used a Sub-Project must already exist or be added
- Select the Project or Sub-Project tab to be populated
- Select a Project or Sub-Project from the drop down (only one can be selected at a time) and click the Copy button
- Repeat to copy other Project or Sub-Project

Copy Positions From Project:

Example Project

Copy

Figure 25: Copying Inventory from Project "Tutorial Example" to Sub-Project "TutExSP"

Click the **Copy** button.

Now the sub-project contains the same inventory rows as the **Tutorial Example** project. Click each of the project button bars above the **Inventory** area to verify this (Figure 26).

Faces and Spaces are for personnel inventory input.

NOTE: No output will be generated if no inventory is provided.

Edit any Year's inventory and commit changes by clicking the "Update" button.

Example Project

Test Copy Project Renamed

Figure 26: Verifying Sub-Project Inventory Matches the Primary's Project Inventory

You can now adjust inventory contents and quantities using the methods in the sections of this document listed here:

- [Adding Inventory](#)
- [Deleting Inventory](#)
- [Changing Inventory Quantities](#)

For now, keep the inventories as they are to explore the final page of Project Manager. Click the **Output** link on the left side of the Faces & Spaces page or the **Next** button at the bottom right of the page. (Figure 27). This will take you to the **Output** page.

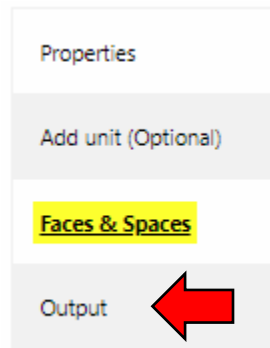

Figure 27: Navigating to the Output Page

OUTPUT

The third page of Project Manager is the **Output** page and it features the ability to build a personnel summary costing report for your project (Figure 28).

Figure 28: Features of the Project Manager “Output” Page

OUTPUT PAGE OVERVIEW

The **Output** page in Figure 28 contains several items to notice:

- The highlighted Output link on the left side indicates this is the active page.
- The center table contains three columns
 - The **Pay Plan** and **Sub-Project** columns represent the project inventory information on the Faces & Spaces page.
 - The **Include In Report** check boxes allow you to choose the project inventory you want to see on the Personnel Summary Report. You can:
 - Manually check individual pay plan(s) desired.
 - Click on **Check all Pay Plans** link to select all Pay Plans for inclusion in the report.
 - Click on **Remove all Checks** link to deselect all Pay Plans.

For our example, click **Check all Pay Plans**

BUILDING THE PERSONNEL SUMMARY REPORT

To build the Personnel Summary Report, click the **Build Report** button (Figure 28). A new browser window will open and the report will load. It may take up to a minute or so to create the report depending on the number of Pay Plans selected, your computer and network connection.

THE PERSONNEL SUMMARY REPORT

Once the report completes expand the browser window to better view it. The report has the following main sections. Figures 29 through 35 display each of these.

Export to Microsoft Excel

You can export your Personnel Summary Report to Microsoft Excel. The **Export to Excel** button looks like an Excel icon and is located at the top left of the report above the **Report Properties** section (Figure 29).

 **NOTE: This report can also be copied into MS Excel directly.**

Figure 29: Export to Excel Button

Report Properties Section

This section contains the project creator plus properties of the main project and the Pay Plans of each included project (Figure 30).

Figure 30: Report Properties Section

Inflation Factors Section

This section contains the current OSD Joint Inflation Calculator (JIC) factors applied to the AMCOS base year cost element costs by appropriation and future project year (Figure 31).

Inflation Factors

The current four Inflation Calculators (ICs) based on the OASIA (3MAC) website, <http://asfia.org/microflation/CI/Items.aspx?CI=4&CI=5>, is the basis for the fourteen (14) inflation factors built into Project Manager (PM). Each component (Active, NG, & Reserve) has four unique sets of "MBA", "MBA Inflation", & "OASIA" inflation factors and Cumulative (G, P, B, T, & S) indices; however, not all indices are only influenced by two inflation factors, "CPI-U" & "OASIA". The "MBA" inflation factor is applied to all MBA Appropriation (APPS) cost elements except Permanent Change of Station (PCS) related cost elements. In this case, the "MBA Inflation Factor" inflation factor is applied to a PCS cost element. When AMCOM LTR displays APPS = "OASIA" or "GMS", the "OASIA" inflation factor is applied to any cost element with other APPS.

[illegible]

Inflation Calculation Nets

In Project Manager (PM), the Fiscal Year (FY) costs generated in AMCOG LITE will be referred to as "BASE YEAR" costs. PM multiplies BASE YEAR costs by the appropriate target year INFLATION FACTOR, generating Future Start Year and/or Future Year Cost Element costs across the entire duration.

Est. Example

The Project Start Year (YearStart) is set to 2022 and the number of years (YearDuration) is set to 1 years for costing an Active Duty position with the focus on "SALARY" cost element.

- 2023 Active Duty Salary = (AMC08 LITE 'Avg Cost Base Pay (Military)' BASE YEAR SALARY) * (2023 Active Duty MPA Inflation Factor)
- 2023 Active Duty Salary = (AMC08 LITE 'Avg Cost Base Pay (Military)' BASE YEAR SALARY) * (2023 Active Duty MPA Inflation Factor)
- 2024 Active Duty Salary = (AMC08 LITE 'Avg Cost Base Pay (Military)' BASE YEAR SALARY) * (2024 Active Duty MPA Inflation Factor)
- Repeating the inflation process until the specified duration completes.

Figure 31: Inflation Factors Section

Discounting and Present Value Factor (PVF) Section

This report section displays the current Office of Management and Budget (OMB) PVF factors applied to each Default Summary's cost element costs by year (Figure 32).

Discounting and Present Value Factor (PVF)

Most cost comparison techniques take into consideration the time value of money; that is, a dollar today is worth some amount less in the future. Discount rates are prepared annually by the Office of Management and Budget (OMB). OMB Circular A-94 and Department of Defense Instruction (DoDI) 7041.3 require the use of a discount rate based on the Treasury Department cost of borrowing funds, and reflect the expected cost of borrowing for 3, 5, 7, 10, 20, and 30 years securities.

Discount Rates Based on 5 Years Securities:

Project Year:	2022	2023	2024	2025	2026
FTE	0.9485	0.99152	0.99354	0.98577	0.96661

Figure 32: Discounting and Present Value Factor (PVF) Section

Inventory Section

The Inventory Section lists the inventory for each selected project and pay plan. Inventory is broken out by pay plan, career group / subgroup, grade, and quantity for each of the project's years (Figure 33).

Inventory

Sub-Project Name	UIC	PayPlan	CategoryGroupCode	CategorySubgroupCode	ActiveDutyDays	Grade	2022	2023	2024	2025	2026
Example Project		AE	11	11B	15	E4	1	1	1	1	1
Example Project		RE	11	11B	15	E1	1	1	1	1	1
Test Copy Project Renamed		AE	11	11B	15	E4	1	1	1	1	1
Test Copy Project Renamed		RE	11	11B	15	E1	1	1	1	1	1

Figure 33: Inventory Section

Cost Section

- The Cost Section's Default Summary (Figures 34-1 and 34-2) displays costs by cost element by year using the same format as the AMCOS Lite grid summary.
- Appropriations (APPN) are color coordinated by funding level, i.e., Army, DoD, Federal, Army Reserve, etc.
 - Green = Army
 - Purple = DoD
 - Blue = Federal
 - Slightly lighter shade of Green = Army Reserve
 -

Default Summary:

APPENDIX A - PAY PLANS AND PERSONNEL CATEGORY SELECTIONS

Project Manager supports the same Personnel Category selections that AMCOS Lite does. Selecting a Pay Plan determines the number and type of subsequent selections. Figure A-1 below shows the selections for **Civ Acq NJ – Technical Management Support**. Supported Pay Plans and their corresponding sub-selections are listed in the below sections of this appendix.

The screenshot shows a web form with the following fields:

- Pay Plan:** Technical Management Support (NJ)
- Group:** 0000 - MISCELLANEOUS OCCUPATIONS GROUP
- Location:** ABERDEEN PROVING GROUND [ARMY] (MD) - DCB
- Grade:** 3
- Inventory:** A table with 5 columns labeled 1 through 5. Each column contains a small input box with the number '1'.
- Insert:** A button located below the inventory table.

Figure A-1: Personnel Category Sub-Selections for Pay Plan "Civ Acq NJ - Technical Management Support"

PAY PLANS

The Personnel Category selection boxes are dropdown boxes with options to allow filtering of cost information returned by AMCOS Lite and Project Manager. The first filtering selection is Pay Plan. AMCOS Project Manager supports the Pay Plans in Figure A-2 and compiles costing information for these Pay Plans from various government sources. Each Pay Plan has a set of lower level Personnel Category selection boxes associated with it. The next section describes the selection options offered under each Pay Plan.

The screenshot shows a dropdown menu for the Pay Plan 'Technical Management Support (NJ)'. The menu is organized into four columns:

- Military:** Active Enlisted (AE), Active Officer (AO), Active Warrant Officer (AWO), National Guard Enlisted (NE), National Guard Officer (NO), National Guard Warrant Officer (NWO).
- Civilian-G/S/C:** Contractor Cost Estimate (CCE), Senior Executive Schedule (SES), Intelligence Personnel (GG), Law Enforcement Officers (GL), Physicians and Dentists (GP), General Schedule (GS).
- Laboratory Demo:** Engineers & Scientists (DB), Engineer & Scientist Technicians (DE), Administrative (DJ), General Support (DK).
- Acquisition Demo:** Business and Technical Management Professionals (NH), Technical Management Support (NJ) (highlighted), Administration Support (NK), Wage (AF), Wage (NAF), Wage Grade (NA), Wage Leader (NL), Wage not otherwise designated (WB).

Figure A-2: Project Manager's Pay Plans

Lower Level Personnel Category Selections for each Pay Plan

The **Enlisted** and **Warrant Officer (Active, National Guard & Reserves)** contain:

- Pay Plan
- Summary (Default)
- Career Management Field (CMF)
- Military Occupation Specialties (MOS)

The **Officer (Active, National Guard & Reserve)** contains:

- Pay Plan
- Summary (Default)
- Branch / Functional Area
- Area of Concentration (AOC)

Civilian Intelligence Personnel (GG), Civilian Law Enforcement Officer (GL), Child and Youth Programs (CY), Civilian General Schedule (GS), and all other CIV based plans not otherwise mentioned contain:

- Pay Plan
- Summary (Default)
- Occupational Group
- Occupational Series
- Occupation Series Subtitle

 **Note:** Very few series subdivide to the Subtitle level. It only appears when some of the Series Subtitles meet Special Pay criteria and the rest of the Series remains on the OPM Base Pay schedule.

- Locality / Location

The **Civilian Physician and Dentist (GP)** plan contains:

- Pay Plan
- Summary (Default)
- Occupational Group
 - 0600 – Medical Hospital Dental, and Public Health Group
- Occupational Series
- State / Country
- Functional Area
- Cost Center

The **Civilian Acquisition (DB, DE, DJ, DK, NH, NJ, & NK)** Pay Plans contain:

- Pay Plan
- Summary (Default)
- Occupational Group
- Occupational Series
